

# **SFTP Manuals**

To Access MRCC SFTP you need **FileZilla** software can be download from the open source.

MRCC IT Team provides SFTP details as below:

<b>Host Name</b>	<b>Login ID</b>	<b>Password</b>	<b>Path To Home Directory</b>
<b>mrccftp.mrccgroup.com</b>	test	*****	<a href="http://mrccftp.mrccgroup.com/test">http://mrccftp.mrccgroup.com/test</a>

1. Open **FileZilla**
2. Enter the address of the server in the field **Host**, located in the **Quickconnect** bar.  
Example:- **mrccftp.mrccgroup.com**
3. Enter your username  
Example: **test**
4. Enter your password.
5. Enter the port number.  
- (port **22** for SFTP)
6. Click on **Quickconnect** or press **Enter** to connect to the server.
7. Click **OK** when you get a warning about an unknown host key, you will get screens as below.

Host: p.mrccgroup.com Username: test Password: ..... Port: 22 Quickconnect

Status: Listing directory /  
 Status: Directory listing of "/" successful  
 Status: Disconnected from server

Local site: D:\Clients\website\SSL\_MRCCGROUP\linux\ Remote site: /

**Note:** - You can drag and drop the files on **Home** folder only.

# ***Download and Live Link manuals***

To create live/download link, right click on the file and click on “copy URL(s) to clipboard”.

Open a notepad and paste same as below.

**sftp://test@mrccftp.mrccgroup.com/Home/Tyrone%20Event%20log.JPG**

Now replace “sftp://test@ mrccftp.mrccgroup.com” with your home path (<http://mrccftp.mrccgroup.com/test> ).

**For Example:**

**sftp://test@mrccftp.mrccgroup.com/test/Home/Tyrone%20Event%20log.JPG**

Live link will be:

<http://mrccftp.mrccgroup.com/test/Home/Tyrone%20Event%20log.JPG>
